
EDUCATION

- **Georgia Institute of Technology, College of Computing** Atlanta, GA
B.S. Computer Science May 2023
 - President of the Georgia Tech iOS Club from 2021–2022; grew membership from <20 to 300+, taught iOS development twice weekly, and helped more than 500 students build apps with SwiftUI and core Apple frameworks.

EXPERIENCE

- **Renegades** New York, NY
Founding Engineer April 2024 – July 2026
 - Crypto app studio focused on attention markets that raised \$5.5M; led engineering on a across mobile, web, backend, and analytics on a four-person team for three **zero-to-one products**.
 - **Scoop**: built a SwiftUI app where users bet on who would go viral on social media; shipped self-custodial wallets and a real-time activity feed; reached **\$2.5M+ in volume** and **\$100K in revenue** within 10 days of launch.
 - **Yapster**: built a daily live multiplayer game with **1,000 concurrent players** and **54% 30-day retention**; shipped an AI image editor, live audio chat, and a native Live Activity and Dynamic Island bridge for React Native.
 - **Frenzy**: built an app where users traded TikTok trends like stocks; shipped **AI agents and evals** to detect trends and measure their growth, real-time trading infrastructure on Solana, and an Apple Pay fiat-to-crypto onramp.
 - Led Frenzy growth by finding viral formats, briefing creators, and running UGC that tripled its user base.
- **APEX → Somatic Health** Atlanta, GA / San Francisco, CA
Co-Founder, Chief Technology Officer → Chief Technology Officer January 2020 – April 2024
 - Co-founded APEX, **raised \$1.5M**, and built a physical therapy app that used AI to recommend exercise routines and computer vision to provide real-time form feedback; hit **\$1M ARR** before APEX was **acquired by Somatic Health**.
 - **Led 10+ engineers** building Somatic's virtual physical therapy platform, enabling clinicians to prescribe and monitor at-home rehabilitation, patients to complete exercises remotely, and clinics to bill insurers for remote care.
- **Independent Product Engineer**
Contractor May 2024 – October 2025
 - Built and launched [Truthly](#), an AI-powered Bible study app now serving **100,000+ users across 165+ countries**; scoped the product with its founders, then independently owned product, design, and engineering through launch.
 - Built iOS and backend features for [Eyeball](#), an AI-powered bookmark manager that let users chat with saved links and receive automatic link and weekly summaries; **acquired by The Sunday Long Read** in August 2026.
 - Built and launched [FistBump](#) with Morning Brew founder Alex Lieberman, a social habit app where friends used photo proof, streaks, and nudges to stay accountable; built the entire SwiftUI app and backend.

PERSONAL PROJECTS

- **PushToPlay** San Francisco, CA
Creator and Engineer 2024
 - Built and grew a SwiftUI app where users earned screen time by doing push-ups; used pose estimation to count reps and Apple's Screen Time framework to block apps; reached **\$5K MRR** through UGC and influencer marketing.
- **Shimmy** San Francisco, CA
Creator and Engineer 2025 – 2026
 - Launched a SwiftUI app for learning dance routines from TikTok and Instagram videos; built the iOS share extension, custom video player, and backend that imported and streamed social videos.

TECHNICAL SKILLS

- **iOS**: Swift, SwiftUI, UIKit, ActivityKit, VisionKit, Screen Time
Full Stack: TypeScript, React Native, Expo, Node.js, Next.js, BullMQ, PostgreSQL, Redis, Firebase, Solana
